

alberi

ALSC 1110 IN

: product card

Alberi is a collection of acoustic wall panels and free-standing screens with a wide range of configuration possibilities. The biophilic shape and patterns have been inspired by trees, while the textures and colours relate to the seasons.

collection advantages

biophilia in the office

Alberi is an excellent alternative to standard acoustic panels because, in addition to their acoustic properties, they also provide a pleasant visual experience and rest for the eyes.

moody colours

The carefully selected colours evoke the seasons and create positive emotions. A wide range of RAL colours allows interesting combinations of frame and fabric shades.

available variants

Panels and screens are available in 2 sizes and 3 embossing patterns.
